Discover our bespoke workspace solutions

From a furniture refresh to
entire fitouts, create a space
that works for you.

We'll make bigger things happen for your space

Imagine your vision coming to life together with our expert Workspace Solutions team.

With all the right tools and years of project management experience on our side, we create contemporary design spaces for organisations in every category. Using quality products at prices you can afford.

Let's create your ideal workspace

Our team will help you tailor your space to suit your organisation.

Seamless from start to finish

From the first design sketches to selecting fit-for-purpose contemporary furniture, we've got the expertise to deliver your ideal commercial fit out. Throughout the process you'll work one-on-one with one of our specialists, supported by our expert project team.

Any space. Any business.

We work with workspaces of every shape and size. From corporate spaces to factories, medical centres and training centres to school offices and classrooms, we can refresh your furniture or design and fit out a new interior that's perfectly tailored to whatever your organisation requires.

High quality. Low prices.

We don't define premium as pricey. We source our products from the best manufacturers with quality that's built to last, backed by up to 15-year warranties so we can keep costs down and deliver exceptional results with the latest on-trend looks.

Contemporary, sustainable design solutions

Our experienced design team can help create practical solutions for a modern office. People and planet are at the heart of what we do, and our range includes products that meet Australian sustainability standards. Keep an eye out for the Australasian Furnishing Research and Development Institute (AFRDI) green and blue tick of approval.

Defits that reduce your impact

We partner with Circonomy to offer Australia's first recovery, repair, and resale service. Together we help you refresh or defit your space sustainably, with the aim of saving your unwanted furniture from landfill.

Better tech for better business

Our experts can help you level up your workspace with the latest audio-visual tech. Enjoy seamless meetings with integrated voice and video conferencing, wireless screen sharing, digital displays, audio installations, acoustic solutions and room scheduling panels.

A history of success

Our expert team of advisors, specialists and project managers have completed over 300 fitout projects across Australia, so you can count on our guidance to deliver yours.

A flexible workspace

We know how important it is for many businesses to build a collaborative and flexible space to suit hybrid working. Just take a look at our past projects to see how we can help you create one.

State-of-the-art with sustainability in mind

Together with Bates Smart Architects, we developed a truly sustainable office across four floors featuring curated products from our suppliers. The result? A workplace designed for a team of 1000 that embraces hybrid working with collaborative and breakout spaces throughout, incorporating 450 long stay desks. Working with our partners, we successfully delivered a state-of-the-art space that achieves a Six Star Energy Rating for the building.

VIC

Heritage refurb, where past meets present

Market Research and Strategy Agency Growth Ops asked Officeworks Workspace Solutions to transform their heritage-style warehouse into a functional space informed by contemporary design elements.

We supplied, delivered and installed 39 desks, partitions and soft wiring throughout the 250sm location. Working closely with the Executive Operations Officer, we kept the project running smoothly, on time and right on budget.

Respected Indigenous partners

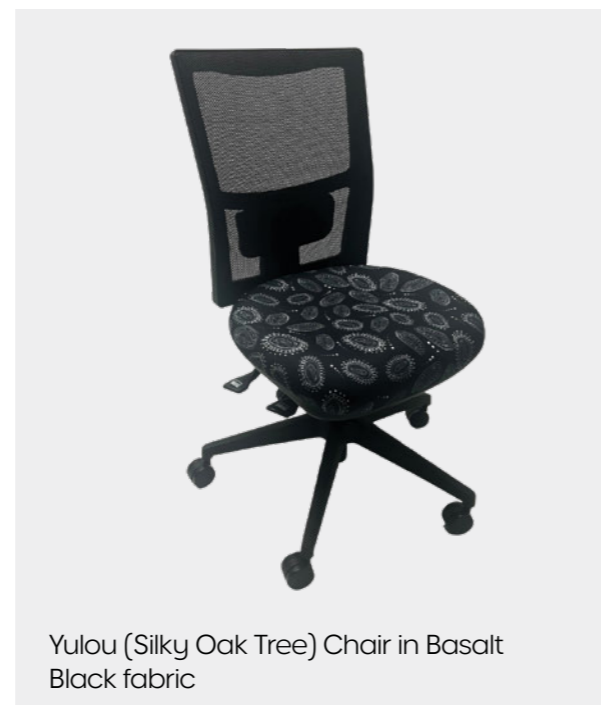

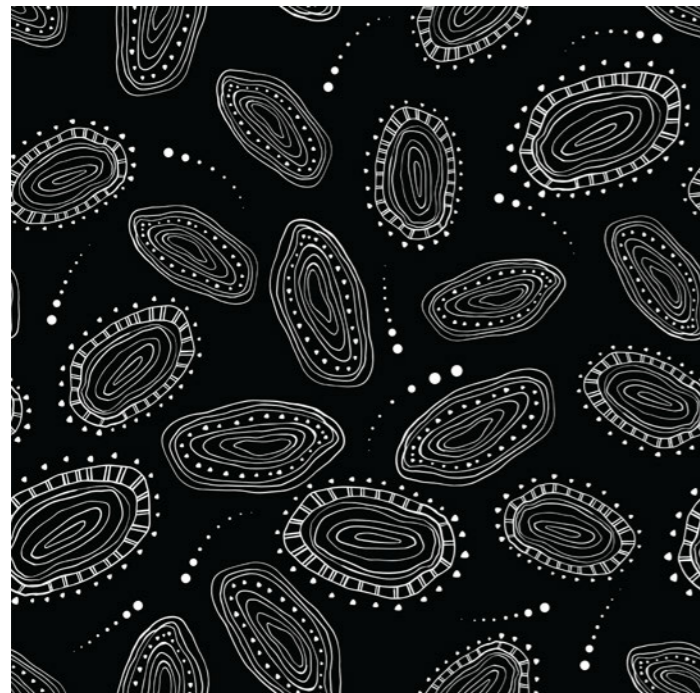

We're proud to partner with YINDI, a pioneering Indigenous Australian furniture manufacturer. Every product supports their mission of fostering socio-economic growth, empowering Indigenous communities, and promoting cultural diversity within the furniture sector. They're a shining example of how Indigenous-owned business can drive positive change.

A blend of traditional culture and modern design
Inspired by the basaltic rocks native to Ewamian and Western Yalanji country in Far North Queensland, the Butchulla Range was designed to leave a lasting legacy of cultural heritage in office spaces.

Sustainable Practice
YINDI products are created from the most sustainable Australian materials, showcasing Indigenous craftsmanship and innovation. They have built a sustainable business model that uplifts Indigenous communities while delivering high-quality, contemporary office furniture products.

A range that's more than meets the eye

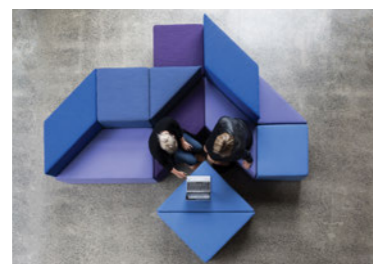

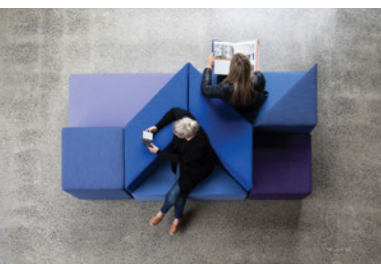

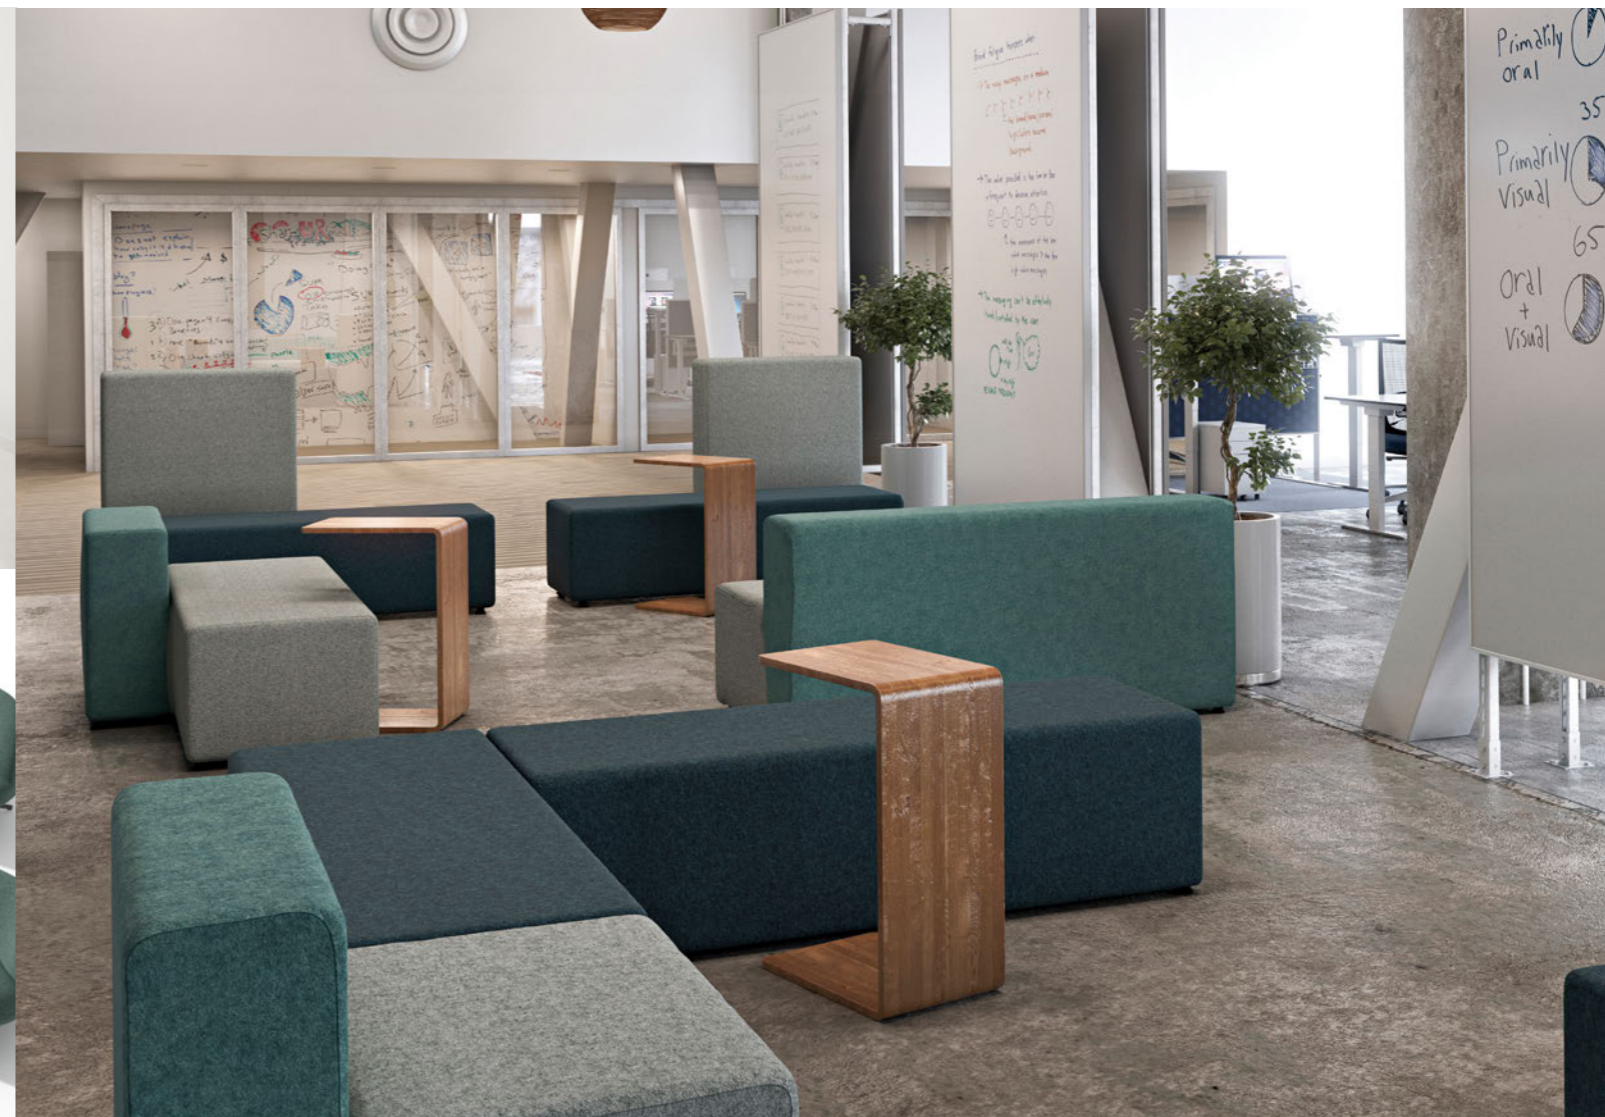

However you imagine your ideal workspace, we'll bring it to life. Partnered with an unmatched network of local and international suppliers, we've got access to all the latest products and fitout solutions including exclusive extended commercial and designer ranges you won't find online or in-store.

Your space. Your way.

Everything we create is tailored to your vision, requirements and budget. Maybe you're looking to make your space more ergonomic, welcoming, or tech-ready.

As fitout experts, we'll learn all about your business, space and style and work with you to craft the perfect configuration – or simply refresh a few pieces. Take inspiration from the latest trending pieces, add your unique flair, or build something that seamlessly complements your brand.

On budget. Above expectation.

We understand cost is always a factor. That's why we take pride in our trusted manufacturer relationships that let us offer you the best possible price — whether it's a full office overhaul or the final piece of the puzzle that makes your space whole.

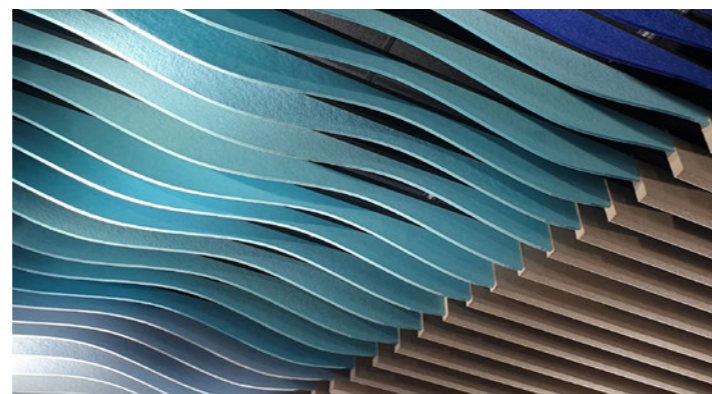

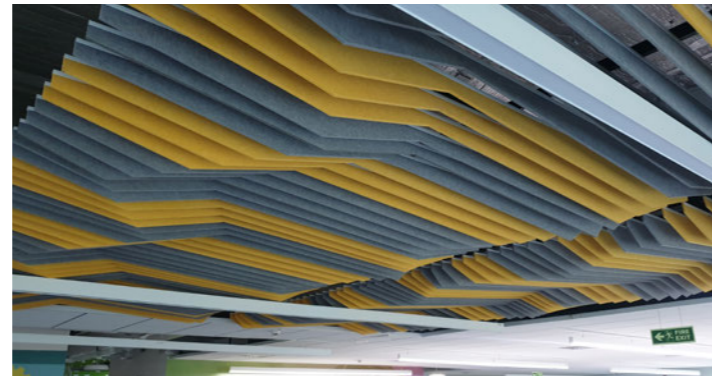

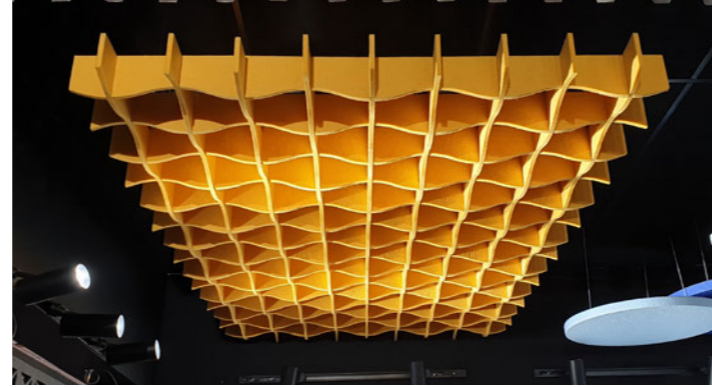

Whether you'd like us to order stock from our warehouses across Australia or deliver direct from our suppliers to save your bottom line, we'll help you save where it counts.

Quality that's built to last

That's our promise. No matter what you order from our extended range, you can trust it's made from the highest quality materials and backed by warranties of up to 15 years.

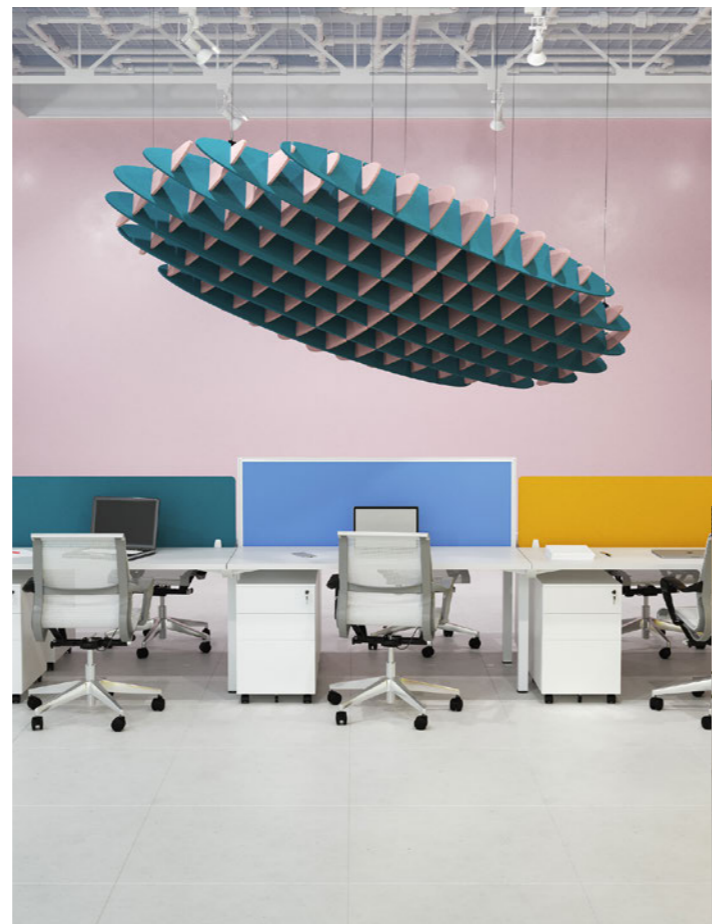

Absorb all distractions.

As much as we love a vibrant and buzzing work culture, it can make it difficult to focus.

Our acoustic solutions help reduce noise in your workplace. We use acoustic-absorbing materials like ceiling sound traps, screens, and panels to block noise reverberation. These practical and stylish solutions help optimise productivity and can be customised to any space.

Maximise Focus

For those sensitive or confidential meetings, booths are an effective way to create private spaces within an open-plan workspace. They are designed to keep your attention in and surrounding noise out.

A modern office lounge area featuring curved, light-colored sofas with dark blue accents. The room has a light wood floor, white walls, and a wooden slat ceiling. Several green plants are scattered throughout the space. A dark blue overlay with white text is positioned on the right side of the image.

**Expect quality
design, furniture,
fitouts and more
when you refresh
your space with
the experts.**
